

BUILT TO LAST. SHAPED BY LEGACY.

A LEGACY BUILT BRICK BY BRICK

The AB Bricks story began with one man's determination and a patch of land. Shri Sakarchand Mulchand Prajapati laid the foundation with traditional kilns and a vision that would shape generations.

From Waghjipura to Sanand and now Sakodara, each expansion reflected not just business growth but the grit of a family deeply rooted in the craft of brickmaking. What started as a modest venture evolved into a name trusted by builders, architects, and communities alike.

Today, his sons Bharatbhai and Dipakbhai manage the Sakodara units, while grandson Arvindbhai continues the legacy in Sanand – all staying true to the same principles of quality, trust, and hard work.

We also honor the quiet strength of Smt. Amthiben Prajapati, who stood shoulder to shoulder with her husband, molding bricks with her own hands and shaping the very foundation of this legacy.

A STORY FIRED IN CLAY AND COMMITMENT

From a humble kiln to three thriving factories, our journey is one of relentless hard work, bold decisions, and generational unity. What began with Shri Sakarchand Prajapati's vision now stands as Gujarat's trusted name in brick manufacturing.

OUR PRODUCT RANGE

At AB Bricks, we understand that every structure has a story – and the right brick can bring it to life. Our product range balances tradition and innovation to meet modern construction needs.

UNFINISHED CLADDING BRICK

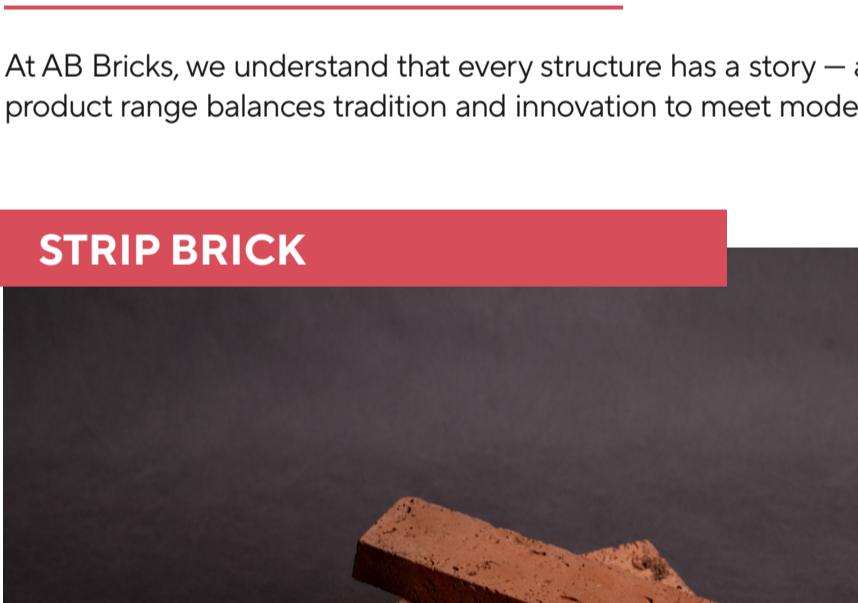

Raw, natural, and timeless. Ideal for rustic themes and exposed interiors.
